EDUCATION

B-Tech in Computer Science & Engineering (AI&ML)

VIT Bhopal University - CGPA 8.24

10/2022 - 04/2026

Senior Secondary – MPC (TSBIE)

Akshara Junior College - 95.6%

04/2021 - 03/2022

SKILLS

Languages: Java • Python • JavaScript • SQL | **CS Concepts:** OOP • DSA • OS • CN

Tools/Tech: Node.js • React.js • Express • AWS • Git • Docker • HTML/CSS.

EXPERIENCE

Entrepreneurship Cell, VIT Bhopal

Operations Co-Lead

VIT Bhopal University

Jan 2024 - Present

- Built partnerships with over 15 startups and initiated the setup of a campus incubation center, improving startup engagement by 40% in under 6 months.
- Managed 10+ initiatives, increasing student participation by 60% on campus.

ACHIEVEMENTS

- Led a team in Smart India Hackathon 2024, clearing the internal round by rapidly building a functional prototype for the proposed solution.
- Gained hands-on experience in software development and team-based collaboration.

PROJECTS

JiraGenie – AI-Powered Development Automation Tool (Ongoing) | [Link](#)

Key Skills: Python, FastAPI, GitPython, ReactJS, Hugging Face, AWS.

- Built an AI tool to generate code from Jira tasks, manage Git branches, and automate pull requests. Reduced sprint effort by 56% using Agile practices, version control, and code review workflows.
- Designed a modular FastAPI backend leveraging GitPython to automate Git workflows and streamline DevOps pipelines, following best coding practices.
- Integrated CodeGen-350-mono model, to generate contextual code, improving development speed and issue resolution efficiency by ~20%.

BlockMeds – Blockchain-Based Pharmaceutical Tracker | [Link](#)

Key Skills: JavaScript, Node.js, Express.js, HTML, CSS, Blockchain.

- Developed a blockchain-based supply chain management system to verify drug authenticity across distributor, vendor, and consumer roles.
- Deployed RESTful APIs and a custom block explorer to enhance product traceability, improving accuracy by 85% in test environments.
- Strengthened pharmaceutical supply chain security by implementing decentralized, tamper-proof tracking to reduce counterfeit circulation.
