EDUCATION

VIT Bhopal University

Bhopal, India

B.Tech in Computer Science and Engineering (AI and ML) ; CGPA: 8.34/10.0

2022 – 2026

Courses: Data Structures and Algorithms, Machine Learning (ML), Operating Systems (OS), Database Management Systems (DBMS), Deep Learning (DL), Natural Language Processing (NLP)

TECHNICAL SKILLS

Languages: Python, SQL, Java, Javascript, C++

Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Transformers, Streamlit

Data & BI Tools: Microsoft Excel, Power BI, Tableau

Tools & Technologies: AWS, Git, Docker, REST APIs, Jupyter

Platforms & IDEs: Google Colab, GitHub, VS Code, Anaconda

Certifications: Applied ML with Python (Michigan University - Coursera), GEN AI Using IBM Watsonx , International Leadership and Organizational Behavior by (Università Bocconi - Coursera)

EXPERIENCE

Entrepreneurship Cell, VIT Bhopal

Operations Co-Lead

VIT Bhopal University

Jan 2024 – May 2025

- Built partnerships with over 15 startups and initiated the setup of a campus incubation center, improving startup engagement by 40% in under 6 months.
- Managed 10+ initiatives, increasing student participation by 60% on campus.

PROJECTS

CreditFortify – AI-Powered Credit Risk Assessment System | [Link](#) | Python, Scikit-learn, TensorFlow, XGBoost

- Developed machine learning system predicting loan defaults with 98.6% accuracy and 0.99 AUC on 45,000-entry dataset using XGBoost and TensorFlow.
- Built Streamlit web application with automated EDA pipeline, CSV retraining feature, and interactive dashboards for stakeholder insights.

SentiPulse Analytics - Real-time Twitter Sentiment Analysis Platform | [Link](#) | Python, Streamlit, Twitter API

- Created a real-time sentiment analysis platform processing 10,000+ tweets using Twitter API and NLP algorithms with interactive Streamlit interface.
- Designed analytics dashboard with sentiment gauges, Plotly visualizations, and tweet tables for real-time brand monitoring and insights.

JiraGenie – AI-Powered Development Automation Tool (Ongoing) | [Link](#) | Python, FastAPI, ReactJS, AWS

- Streamlined the development workflow by automating code generation and Git processes via Jira webhooks, cutting manual effort by 56% per sprint.
- Optimized the backend by integrating FastAPI and GitPython, which boosted development speed and efficiency by 20%.

ACHIEVEMENTS & AWARDS

- Secured and formalized 6 Memoranda of Understanding (MOUs) for university student startups during a two-day E-Summit, fostering key entrepreneurial partnerships.
- Selected for SIH '24 (Internal Round) – Team shortlisted for contract-based farming solution.
